

Keys, Relays, and JSON: Building on Nostr

CodeMash Conference

Franklin Diaz

2027

Protocol Architecture

- **Clients:** Cryptographic keyholders (Schnorr / secp256k1).
- **Relays:** Simple WebSocket servers for routing signed JSON.
- **Events:** Immutable, cryptographically signed atomic payloads.

Publishing Signed Events

```
{  
  "kind": 1,  
  "pubkey": "<hex-key>",  
  "created_at": 1724068800,  
  "tags": [],  
  "content": "Hello CodeMash!",  
  "sig": "<schnorr-signature>"  
}
```
